## **Independent Auditors' Report**

### **To the Shareholders of BonTerra Resources Inc.**

We have audited the accompanying consolidated financial statements of BonTerra Resources Inc. and its subsidiaries, which comprise the consolidated statements of financial position as at May 31, 2014 and May 31, 2013, and the consolidated statements of comprehensive loss, changes in equity and cash flows for the years then ended, and a summary of significant accounting policies and other explanatory information.

#### **Management's Responsibility for the Consolidated Financial Statements**

Management is responsible for the preparation and fair presentation of these consolidated financial statements in accordance with International Financial Reporting Standards, and for such internal control as management determines is necessary to enable the preparation of consolidated financial statements that are free from material misstatement, whether due to fraud or error.

#### **Auditors' Responsibility**

Our responsibility is to express an opinion on these consolidated financial statements based on our audits. We conducted our audits in accordance with Canadian generally accepted auditing standards. Those standards require that we comply with ethical requirements and plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the consolidated financial statements. The procedures selected depend on the auditors' judgment, including the assessment of the risks of material misstatement of the consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditors consider internal control relevant to the entity's preparation and fair presentation of the consolidated financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements.

We believe that the audit evidence we have obtained in our audits is sufficient and appropriate to provide a basis for our audit opinion.

#### **Opinion**

In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of BonTerra Resources Inc. and its subsidiaries as at May 31, 2014 and May 31, 2013 and its financial performance and its cash flows for the years then ended in accordance with International Financial Reporting Standards.

#### **Emphasis of matter**

Without modifying our opinion, we draw attention to Note 2 to the consolidated financial statements which describes the material uncertainty that may cast significant doubt about the ability of BonTerra Resources Inc. to continue as a going concern.

## BONTERRA RESOURCES INC.

Notes to the Consolidated Financial Statements

For the Years Ended May 31, 2014 and 2013

(Expressed in Canadian Dollars)

---

### 1. NATURE OF OPERATIONS AND CONTINUANCE OF OPERATIONS

Bonterra Resources Inc. (the “Company”) is an exploration stage company incorporated on May 1, 2007, under the laws of the Province of British Columbia, Canada. Its principal business activity is the acquisition, exploration and evaluation of mineral properties located in the Provinces of British Columbia and Quebec, Canada. The Company’s common shares are traded on the TSX Venture Exchange (“TSX-V”) under the symbol “BTR”. The Company’s head office and principal business address is 430-609 Granville Street, Vancouver, British Columbia, Canada, V7Y 1G5. The Company’s registered and records office is 1000-595 Burrard Street, Vancouver, British Columbia, Canada, V7X 1S8.

### 2. GOING CONCERN

These consolidated financial statements have been prepared on the basis of accounting principles applicable to a going concern, which assumes that the Company will continue in operation for the foreseeable future and will be able to realize its assets and discharge its liabilities in the normal course of operations.

The Company incurred a comprehensive loss of \$649,783 for the year ended May 31, 2014 (2013 - \$6,771,966), and has an accumulated deficit of \$16,614,374 and working capital deficiency of \$951,009 at May 31, 2014 (2013 - deficit of \$16,076,836 and working capital deficiency of \$1,160,222). These factors indicate the existence of a material uncertainty that may cast significant doubt about the Company's ability to continue as a going concern.

The Company’s ability to continue its operations and to realize assets at their carrying values is dependent upon its ability to fund its existing acquisition and exploration commitments on its exploration and evaluation assets when they come due, which would cease to exist if the Company decides to terminate its commitments, and to cover its operating costs. The Company may be able to generate working capital to fund its operations by the sale of its exploration and evaluation assets or raising additional capital through equity markets. However, there is no assurance it will be able to raise funds in the future. These consolidated financial statements do not give effect to any adjustments required to realize its assets and discharge its liabilities in other than the normal course of business and at amounts different from those reflected in the accompanying consolidated financial statements.

### 3. BASIS OF PREPARATION

#### a) Statement of compliance

These consolidated financial statements are prepared in accordance with International Financial Reporting Standards (“IFRS”), as issued by the International Accounting Standards Board (“IASB”).

These consolidated financial statements were reviewed by the Audit Committee and approved and authorized for issue by the Board of Directors on September 26, 2014.

#### b) Basis of measurement

These consolidated financial statements have been prepared under the historical cost basis, except for financial instruments classified as available-for-sale (“AFS”), and fair value through profit or loss (“FVTPL”). These consolidated financial statements have been prepared under the accrual basis of accounting, except for cash flow information.

## BONTERRA RESOURCES INC.

Notes to the Consolidated Financial Statements

For the Years Ended May 31, 2014 and 2013

(Expressed in Canadian Dollars)

---

### 3. BASIS OF PRESENTATION (Continued)

#### c) Subsidiaries

These consolidated financial statements include the accounts of the Company and the following subsidiaries. All intercompany transactions and balances have been eliminated.

	Country of Incorporation	Percentage of Ownership at May 31, 2014	Percentage of Ownership at May 31, 2013
Symphony Resources Ltd. ("Symphony")	USA	100%	100%
0819904 B.C. Ltd.	Canada	100%	100%

### 4. SIGNIFICANT ACCOUNTING POLICIES

The accounting policies have been applied consistently throughout to the Company for purposes of these consolidated financial statements.

#### a) Cash and cash equivalents

Cash and cash equivalents includes cash on hand, demand deposits with financial institutions and other short-term, highly liquid investments with original maturities of three months or less that are readily convertible to known amounts of cash and subject to an insignificant risk of change in value.

#### b) Exploration and evaluation assets

##### i) *Pre-exploration Costs*

Pre-exploration costs are expensed in the year in which they are incurred.

##### ii) *Exploration and evaluation expenditures*

Once the legal right to explore a property has been acquired, costs directly related to exploration and evaluation expenditures are recognized and capitalized, in addition to the acquisition costs. These direct expenditures include such costs as materials used, surveying costs, drilling costs, payments made to contractors and amortization on plant and equipment during the exploration phase. Costs not directly attributable to exploration and evaluation activities, including general administrative overhead costs, are expensed in the year in which they occur.

Mining exploration tax credits for certain exploration expenditures incurred in Quebec and British Columbia are treated as a reduction of the exploration and development costs of the respective resource property. The amounts are recorded in the year they are received.

Mineral property acquisition costs and exploration and evaluation expenditures are recorded at cost. When shares are issued as part of mineral property acquisition costs, they are valued at the closing share price on the date of issuance. Payments related to a property acquired under an option or joint venture agreement, where payments are made at the sole discretion of the Company, are recorded upon payment.

The Company may occasionally enter into farm-out arrangements, whereby the Company will transfer part of a mineral interest, as consideration, for an agreement by the transferee to meet certain exploration and evaluation expenditures which would have otherwise been undertaken by the Company. The Company does not record any expenditures made by the farmee on its behalf. Any cash consideration received from the agreement is credited against the costs previously capitalized to the mineral interest given up by the Company, with any excess cash accounted for as a gain on disposal.

## BONTERRA RESOURCES INC.

Notes to the Consolidated Financial Statements

For the Years Ended May 31, 2014 and 2013

(Expressed in Canadian Dollars)

---

### 4. SIGNIFICANT ACCOUNTING POLICIES (Continued)

#### b) Exploration and evaluation assets (continued)

##### ii) *Exploration and evaluation expenditures* (continued)

Once the technical feasibility and commercial viability of extracting the mineral resource has been determined, the property is considered to be a mine under development and is classified as 'mines under construction'. Exploration and evaluation assets are tested for impairment before the assets are transferred to development properties.

As the Company currently has no operational income, any incidental revenues earned in connection with exploration activities are applied as a reduction to capitalized exploration and evaluation assets.

Exploration and evaluation assets are classified as intangible.

##### iii) *Decommissioning liabilities*

An obligation to incur decommissioning and site rehabilitation costs occurs when environmental disturbance is caused by exploration, evaluation, development or ongoing production.

Decommissioning and site rehabilitation costs arising from the installation of plant and other site preparation work, discounted to their net present value, are provided when the obligation to incur such costs arises and are capitalized into the cost of the related asset. These costs are charged against operations through amortization of the asset and unwinding of the discount on the provision.

Amortization is included in operating costs while the unwinding of the discount is included as a financing cost. Changes in the measurement of a liability relating to the decommissioning or site rehabilitation of plant and other site preparation work are added to, or deducted from, the cost of the related asset and charged against operating profit or loss. The discount rate used to measure the net present value of the obligations is the pre-tax rate that reflects the current market assessment of the time value of money and the risks specific to the obligation.

The costs for the restoration of site damage, which arises during production, are provided at their net present values and charged against operations as extraction progresses.

#### c) Equipment

Equipment is stated at cost less accumulated amortization and impairment losses. The residual value, useful life and amortization method are evaluated every reporting period and changes to the residual value, estimated useful life or amortization method resulting from such review are accounted for prospectively. Amortization is provided for using the declining-balance method at the following rates per annum:

Computer equipment	30%
Furniture and equipment	20%

## BONTERRA RESOURCES INC.

Notes to the Consolidated Financial Statements

For the Years Ended May 31, 2014 and 2013

(Expressed in Canadian Dollars)

---

### 4. SIGNIFICANT ACCOUNTING POLICIES (Continued)

#### d) Impairment of non-financial assets

Impairment tests on intangible assets with indefinite useful economic lives are undertaken annually at every reporting period. Other non-financial assets, including exploration and evaluation assets are subject to impairment tests whenever events or changes in circumstances indicate that their carrying amount may not be recoverable. Where the carrying value of an asset exceeds its recoverable amount, which is the higher of value in use and fair value less costs to sell, the asset is written down accordingly. Where it is not possible to estimate the recoverable amount of an individual asset, the impairment test is carried out on the asset's cash-generating unit, which is the lowest group of assets in which the asset belongs for which there are separately identifiable cash inflows that are largely independent of the cash inflows from other assets. The Company has one cash-generating unit for which impairment testing is performed.

An impairment loss is charged to profit or loss, except to the extent they reverse gains previously recognized in accumulated other comprehensive loss/income.

#### e) Financial instruments

##### i) *Financial assets*

The Company classifies its financial assets in the following categories: Fair value through profit or loss, held-to-maturity investments, loans and receivables, and available-for-sale. The classification depends on the purpose for which the financial assets were acquired. Management determines the classification of assets at recognition.

- Financial assets at fair value through profit or loss ("FVTPL")  
Financial assets at FVTPL are initially recognized at fair value with changes in fair value recorded through profit or loss.
- Held-to-maturity investments ("HTM")  
HTM investments are recognized on a trade-date basis and are initially measured at fair value, including transaction costs. HTM investments are carried at amortized cost, using the effective interest method, less any impairment.
- Loans and receivables  
Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They are included in current assets, or non-current assets based on their maturity date. Loans and receivables are carried at amortized cost, using the effective interest method, less any impairment.
- Available-for-sale financial assets ("AFS")  
AFS financial assets are non-derivatives that are either designated as available-for-sale or not classified in any of the other financial asset categories. Changes in the fair value of AFS financial assets are recognized as other comprehensive income/loss and classified as a component of equity.

Management assesses the carrying value of AFS financial assets at least annually and any impairment charges are recognized in profit or loss. When financial assets classified as AFS are sold, the accumulated fair value adjustments recognized in other comprehensive income/loss are reclassified to profit or loss.

## BONTERRA RESOURCES INC.

Notes to the Consolidated Financial Statements

For the Years Ended May 31, 2014 and 2013

(Expressed in Canadian Dollars)

---

### 4. SIGNIFICANT ACCOUNTING POLICIES (Continued)

#### e) Financial instruments (continued)

##### i) *Financial assets (continued)*

- Effective interest method

The effective interest method calculates the amortized cost of a financial asset and allocates interest income over the corresponding period. The effective interest rate is the rate that discounts estimated future cash receipts over the expected life of the financial asset, or, where appropriate, a shorter period, to the net carrying amount on initial recognition.

Income is recognized on an effective interest basis for debt instruments other than those financial assets classified as FVTPL.

- Impairment of financial assets

Financial assets, other than those at FVTPL, are assessed for indicators of impairment at each period end. Financial assets are impaired when there is objective evidence that, as a result of one or more events that occurred after the initial recognition of the financial asset, the estimated future cash flows of the investment have been impacted.

Objective evidence of impairment could include the following:

- Significant financial difficulty of the issuer or counterparty;
- Default or delinquency in interest or principal payments; or
- It has become probable that the borrower will enter bankruptcy or financial reorganization.

For financial assets carried at amortized cost, the amount of the impairment is the difference between the asset's carrying amount and the present value of the estimated future cash flows, discounted at the financial asset's original effective interest rate.

The carrying amount of all financial assets, excluding trade receivables, is directly reduced by the impairment loss. The carrying amount of trade receivables is reduced through the use of an allowance account. When a trade receivable is considered uncollectible, it is written off against the allowance account. Subsequent recoveries of amounts previously written off are credited against the allowance account. Changes in the carrying amount of the allowance account are recognized in profit or loss.

With the exception of AFS equity instruments, if, in a subsequent period, the amount of the impairment loss decreases and the decrease relates to an event occurring after the impairment was recognized; the previously recognized impairment loss is reversed through profit or loss. On the date of impairment reversal, the carrying amount of the financial asset cannot exceed its amortized cost had impairment not been recognized.

##### ii) *Financial liabilities*

The Company classifies its financial liabilities in the following categories: Borrowings and other financial liabilities and derivative financial liabilities.

## BONTERRA RESOURCES INC.

Notes to the Consolidated Financial Statements

For the Years Ended May 31, 2014 and 2013

(Expressed in Canadian Dollars)

---

### 4. SIGNIFICANT ACCOUNTING POLICIES (Continued)

#### e) Financial instruments (continued)

##### ii) *Financial liabilities (continued)*

- **Borrowings and other financial liabilities**  
Borrowings and other financial liabilities are non-derivatives and are recognized initially at fair value, net of transaction costs incurred and are subsequently stated at amortized cost. Any difference between the amounts originally received, net of transaction costs, and the redemption value is recognized in profit or loss over the period to maturity using the effective interest method. Borrowings and other financial liabilities are classified as current or non-current based on their maturity date.
- **Derivative Financial liabilities**  
Derivative financial liabilities are initially recognized at their fair value on the date the derivative contract is entered into and are subsequently re-measured at their fair value at each reporting period with changes in the fair value recognized in profit and loss. Derivative financial liabilities include warrants issued by the Company denominated in a currency other than the Company's functional currency.

##### iii) *Fair value hierarchy*

Fair value measurements of financial instruments are required to be classified using a fair value hierarchy that reflects the significance of inputs used in making the measurements. The levels of the fair value hierarchy are defined as follows:

- |          |  |
|----------|--|
| Level 1: | Quoted prices (unadjusted) in active markets for identical assets or liabilities.  |
| Level 2: | Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. |
| Level 3: | Inputs for assets or liabilities that are not based on observable market data.   |

#### f) Income taxes

Income tax expense consisting of current and deferred tax expense is recognized in the statement of comprehensive loss. Current tax expense is the expected tax payable on the taxable income for the year, using tax rates enacted or substantively enacted at period-end, adjusted for amendments to tax payable with regard to previous years.

Deferred tax assets and liabilities and the related deferred income tax expense or recovery are recognized for deferred tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax basis. Deferred tax assets and liabilities are measured using the enacted or substantively enacted tax rates expected to apply when the asset is realized or the liability settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in profit or loss in the period that substantive enactment occurs.

A deferred tax asset is recognized to the extent that it is probable that future taxable income will be available against which the asset can be utilized. To the extent that the Company does not consider it probable that a deferred tax asset will be recovered, the deferred tax asset is reduced. Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Company intends to settle its current tax assets and liabilities on a net basis.

## BONTERRA RESOURCES INC.

Notes to the Consolidated Financial Statements

For the Years Ended May 31, 2014 and 2013

(Expressed in Canadian Dollars)

---

### 4. SIGNIFICANT ACCOUNTING POLICIES (Continued)

#### g) Share capital

Equity instruments are contracts that give a residual interest in the net assets of the Company. Financial instruments issued by the Company are classified as equity only to the extent that they do not meet the definition of a financial liability or financial asset. The Company's common shares, stock options, share purchase warrants and flow-through shares are classified as equity instruments.

Incremental costs directly attributable to the issue of new shares or options are shown in equity as a deduction, net of tax, from the proceeds.

The Company has adopted a pro rata method with respect to the measurement of shares and warrants issued as private placement units. The pro rata method required each component to be valued at fair value and an allocation of the total proceeds received based on the pro rata relative values of the components.

The fair value of the common shares is based on the closing quoted bid price on the announcement date and the fair value of the common share purchase warrants is determined at the announcement date using the Black-Scholes pricing model. The fair value attributed to the warrants is recorded in equity reserves.

#### h) Flow-through shares

The Company will from time to time, issue flow-through common shares to finance a significant portion of its exploration program. Pursuant to the terms of the flow-through share agreements, these shares transfer the tax deductibility of qualifying resource expenditures to investors. On issuance, the Company bifurcates the flow-through share into i) a flow-through share premium, equal to the estimated premium, if any, investors pay for the flow-through feature, which is recognized as a liability, and ii) share capital. Upon expenditures being incurred, the Company derecognizes the liability and recognizes a deferred tax liability for the amount of tax reduction renounced to the shareholders. The premium is recognized as other income and the related deferred tax is recognized as a tax provision.

Proceeds received from the issuance of flow-through shares are restricted to be used only for Canadian resource property exploration expenditures within a two-year period. The Company may also be subject to a Part XII.6 tax on flow-through proceeds renounced under the Look-back Rule, in accordance with the Government of Canada flow-through regulations. When applicable, this tax is accrued as an expense until paid.

#### i) Earnings (loss) per share

The Company presents basic earnings (loss) per share data for its common shares, calculated by dividing the income (loss) attributable to common shareholders of the Company by the weighted average number of shares outstanding during the period. The Company uses the treasury stock method for calculating diluted earnings (loss) per share. Under this method the dilutive effect on earnings per share is calculated on the use of the proceeds that could be obtained upon exercise of options, warrants and similar instruments. It assumes that the proceeds of such exercise would be used to purchase common shares at the average market price during the period. However, the calculation of diluted loss per share excludes the effects of various conversions and exercise of options and warrants that would be anti-dilutive.

Notes to the Consolidated Financial Statements

For the Years Ended May 31, 2014 and 2013

(Expressed in Canadian Dollars)

---

### 4. SIGNIFICANT ACCOUNTING POLICIES (Continued)

#### j) Share-based payments

The Company grants share options to acquire common shares of the Company to directors, officers, employees and consultants. The fair value of share-based payments to employees is measured at grant date, using the Black-Scholes option pricing model, and is recognized over the vesting period for employees using the graded method. Fair value of share-based payments for non-employees is recognized and measured at the date the goods or services are received based on the fair value of the goods or services received. If it is determined that the fair value of goods and services received cannot be reliably measured, the share-based payment is measured at the fair value of the equity instruments issued using the Black-Scholes option pricing model.

For both employees and non-employees, the fair value of share-based payments is recognized as either an expense or as mineral property interests with a corresponding increase in share-based payments reserve. The amount recognized as expense is adjusted to reflect the number of share options expected to vest. Consideration received on the exercise of stock options is recorded in share capital and the related share-based payment in share-based payments reserve is transferred to share capital.

#### k) New accounting standards issued but not yet effective

##### *IFRS 9 Financial Instruments (2009)*

IFRS 9 introduces new requirements for classifying and measuring financial assets, as follows:

- Debt instruments meeting both a “business model” test and a “cash flow characteristics” test are measured at amortized cost (the use of fair value is optional in some limited circumstances)
- Investments in equity instruments can be designated as “fair value through other comprehensive income” with only dividends being recognized in profit or loss
- All other instruments (including all derivatives) are measured at fair value with changes recognized in profit or loss
- The concept of “embedded derivatives” does not apply to financial assets within the scope of the standard and the entire instrument must be classified and measured in accordance with the above guidelines.

This standard is effective for annual periods beginning on or after January 1, 2018.

##### *IFRS 9 Financial Instruments (2010)*

This is a revised version incorporating revised requirements for the classification and measurement of financial liabilities, and carrying over the existing de-recognition requirements from IAS 39 *Financial Instruments: Recognition and Measurement*.

The revised financial liability provisions maintain the existing amortized cost measurement basis for most liabilities. New requirements apply where an entity chooses to measure a liability at fair value through profit or loss – in these cases, the portion of the change in fair value related to changes in the entity's own credit risk is presented in other comprehensive income rather than within profit or loss.

This standard is effective for annual periods beginning on or after January 1, 2018.

### 4. SIGNIFICANT ACCOUNTING POLICIES (Continued)

- k) New accounting standards issued but not yet effective (continued)

#### *Offsetting Financial Assets and Financial Liabilities (Amendments to IAS 32)*

Amends IAS 32 *Financial Instruments: Presentation* to clarify certain aspects because of diversity in application of the requirements on offsetting, applicable to annual periods beginning on or after January 1, 2014, focused on four main areas:

- the meaning of “currently has a legally enforceable right of set-off”
- the application of simultaneous realization and settlement
- the offsetting of collateral amounts
- the unit of account for applying the offsetting requirements.

#### *Amendments to IAS 36 Impairment of Assets*

On May 29, 2013, the IASB made amendments to the disclosure requirements of IAS 36, requiring disclosure, in certain instances, of the recoverable amount of an asset or cash generating unit, and the basis for the determination of fair value less costs of disposal, when an impairment loss is recognized or when an impairment loss is subsequently reversed. These amendments are effective for annual periods beginning on or after January 1, 2014.

The Company will adopt the amendments of IAS 32 and IAS 36 for its reporting period beginning June 1, 2014 and does not expect the adoption to have a significant impact on its financial statements.

### 5. CRITICAL ACCOUNTING ESTIMATES AND JUDGMENTS

The Company makes estimates and assumptions about the future that affect the reported amounts of assets and liabilities. Estimates and judgments are continually evaluated based on historical experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. In the future, actual experience may differ from these estimates and assumptions.

The effect of a change in an accounting estimate is recognized prospectively by including it in comprehensive income/loss in the year of the change, if the change affects that year only, or in the year of the change and future years, if the change affects both.

#### *Critical judgments in applying accounting policies*

Information about critical judgments in applying accounting policies that have the most significant risk of causing material adjustment to the carrying amounts of assets and liabilities recognized in the consolidated financial statements within the next financial year are discussed below:

- a) Impairment of exploration and evaluation assets

The application of the Company’s accounting policy for exploration and evaluation expenditure and impairment of the capitalized expenditures requires judgment in determining whether it is likely that future economic benefits will flow to the Company, which may be based on assumptions about future events or circumstances. Estimates and assumptions made may change if new information becomes available. If, after expenditure is capitalized, information becomes available suggesting that the recovery of expenditure is unlikely, the amount capitalized is written off in the profit or loss in the year the new information becomes available.

Notes to the Consolidated Financial Statements

For the Years Ended May 31, 2014 and 2013

(Expressed in Canadian Dollars)

---

### 5. CRITICAL ACCOUNTING ESTIMATES (Continued)

#### *Critical judgments in applying accounting policies (continued)*

##### b) Title to mineral property interests

Although the Company has taken steps to verify title to mineral properties in which it has an interest, these procedures do not guarantee the Company's title. Such properties may be subject to prior agreements or transfers and title may be affected by undetected defects.

##### c) Income taxes

Significant judgment is required in determining the provision for income taxes. There are many transactions and calculations undertaken during the ordinary course of business for which the ultimate tax determination is uncertain. The Company recognizes liabilities and contingencies for anticipated tax audit issues based on the Company's current understanding of the tax law. For matters where it is probable that an adjustment will be made, the Company records its best estimate of the tax liability including the related interest and penalties in the current tax provision. Management believes they have adequately provided for the probable outcome of these matters; however, the final outcome may result in a materially different outcome than the amount included in the tax liabilities.

In addition, the Company recognizes deferred tax assets relating to tax losses carried forward to the extent that it is probable that taxable profit will be available against which a deductible temporary difference can be utilized. This is deemed to be the case when there are sufficient taxable temporary differences relating to the same taxation authority and the same taxable entity which are expected to reverse in the same year as the expected reversal of the deductible temporary difference, or in years into which a tax loss arising from the deferred tax asset can be carried back or forward. However, utilization of the tax losses also depends on the ability of the taxable entity to satisfy certain tests at the time the losses are recouped.

#### *Key sources of estimation uncertainty*

The following are key assumptions concerning the future and other key sources of estimation uncertainty that have a significant risk of resulting in material adjustments to the consolidated financial statements.

##### a) Decommissioning liabilities

Rehabilitation provisions have been created based on the Company's internal estimates. Assumptions, based on the current economic environment, have been made which management believes are a reasonable basis upon which to estimate the future liability. These estimates take into account any material changes to the assumptions that occur when reviewed regularly by management. Estimates are reviewed annually and are based on current regulatory requirements. Significant changes in estimates of contamination, restoration standards and techniques will result in changes to provisions from year to year. Actual rehabilitation costs will ultimately depend on future market prices for the rehabilitation costs which will reflect the market condition at the time the rehabilitation costs are actually incurred. The final cost of the currently recognized rehabilitation provisions may be higher or lower than currently provided for. As at May 31, 2014, the Company has no known rehabilitation requirements and accordingly, no provision has been made.

## BONTERRA RESOURCES INC.

Notes to the Consolidated Financial Statements

For the Years Ended May 31, 2014 and 2013

(Expressed in Canadian Dollars)

---

### 5. CRITICAL ACCOUNTING ESTIMATES (Continued)

*Key sources of estimation uncertainty (continued)*

#### b) Share purchase warrant valuation

The Company measures the value of share purchase warrants issued as part of private placement units using a pro rata method. The pro rata method requires each component to be valued at fair value and an allocation of the total proceeds received based on the pro rata relative values of the components. The fair value of the common share purchase warrants is determined at the announcement date using the Black-Scholes pricing model. Estimating fair value for share purchase warrants requires determining the most appropriate valuation model, which is dependent on the terms and conditions of the grant. This estimate also requires determining the most appropriate inputs to the valuation model including the expected life of the share purchase warrant, volatility and dividend yield and making assumptions about them. The assumptions and models used for estimating fair value for share purchase warrants are disclosed in note 13.

### 6. FINANCIAL INSTRUMENTS

Financial instruments are agreements between two parties that result in promises to pay or receive cash or equity instruments. The Company classifies its financial instruments as follows: cash is classified as financial assets at FVTPL; receivables as loans and receivables; marketable securities as AFS financial assets; reclamation deposit as HTM investments; and accounts payable and accrued liabilities and due to related parties as other financial liabilities. The carrying value of these instruments approximates their fair values due to their short term to maturity.

The following table sets forth the Company's financial assets measured at fair value by levels within the fair value hierarchy:

<b>May 31, 2014</b>	<b>Level 1</b>	<b>Level 2</b>	<b>Level 3</b>	<b>Total</b>
Cash	\$ 2,050	\$ -	\$ -	\$ 2,050
Marketable securities	\$ 23,925	\$ 104,500	\$ -	\$ 128,425

  

<b>May 31, 2013</b>	<b>Level 1</b>	<b>Level 2</b>	<b>Level 3</b>	<b>Total</b>
Cash	\$ 12,558	\$ -	\$ -	\$ 12,558

The Company has exposure to the following risks from its use of financial instruments:

- Credit risk;
- Liquidity risk; and
- Market risk.

#### a) Credit risk

Credit risk is the risk that one party to a financial instrument will cause a financial loss for the other party by failing to discharge an obligation. The Company manages credit risk, in respect of cash, by placing at major Canadian financial institutions. The Company has minimal credit risk.

## BONTERRA RESOURCES INC.

Notes to the Consolidated Financial Statements

For the Years Ended May 31, 2014 and 2013

(Expressed in Canadian Dollars)

---

### 6. FINANCIAL INSTRUMENTS (Continued)

#### b) Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they fall due. The Company's approach to managing liquidity is to ensure, as far as possible, that it will always have sufficient liquid funds to meet its liabilities when due, under both normal and stressed conditions, without incurring unacceptable losses or risking damage to the Company's reputation. The contractual financial liabilities of the Company as of May 31, 2014 equal \$1,094,846 (May 31, 2013 - \$1,192,688). All of the liabilities presented as accounts payable are due within 30 days of May 31, 2014.

The Company intends to address its working capital deficiency through a combination of debt settlement agreements and private placement financings.

#### c) Market risk

Market risk is the risk that changes in market prices, such as foreign exchange rates and interest rates will affect the Company's income or the value of its holdings of financial instruments. The objective of market risk management is to manage and control market risk exposures within acceptable parameters, while optimizing the return on capital.

*i) Currency risk* - The Company has no funds held in a foreign currency and as a result is not exposed to significant currency risk on its financial instruments at year-end.

*ii) Interest rate risk* - Interest rate risk is the risk that future cash flows will fluctuate as a result of changes in market interest rates. Interest earned on cash and reclamation deposit is at nominal interest rates and, therefore, the Company does not consider interest rate risk to be significant. The Company has no interest-bearing financial liabilities.

*iii) Other price risk* - Other price risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate due to changes in market prices, other than those arising from interest rate risk. The Company is exposed to other price risk with respect to its marketable securities.

#### d) Capital management

The Company considers its capital to be comprised of shareholders' equity.

The Company manages the capital structure and makes adjustments to it in light of changes in economic conditions and the risk characteristics of the underlying assets. To maintain or adjust the capital structure, the Company may attempt to issue new shares. Although the Company has been successful at raising funds in the past through the issuance of capital stock, it is uncertain whether it will continue this method of financing due to the current difficult market conditions.

In order to facilitate the management of its capital requirements, the Company prepares expenditure budgets that are updated as necessary depending on various factors, including successful capital deployment and general industry conditions.

Management reviews the capital structure on a regular basis to ensure that the above objectives are met. There have been no changes to the Company's approach to capital management during the year ended May 31, 2014 or 2013. The Company is not subject to externally imposed capital requirements.

### 7. MARKETABLE SECURITIES

On October 25, 2013 the Company entered into an agreement to sell a 1% net smelter return interest in the Eastern Extension property (note 10(b)(ii)) to Gold Royalties Corporation (TSX-V: GRO). The Company received 1,000,000 common shares of GRO on November 7, 2013. 500,000 of the common shares are held in trust until September 8, 2014. The Company recorded share consideration of \$325,000 based on the trading price of the GRO shares on November 7, 2013, discounted by the put option of the shares held in trust for the length of the escrow period, against the carrying amount of the exploration and evaluation assets.

During the year ended May 31, 2014, the Company sold 413,000 (2013 - nil) common shares for proceeds of \$104,717 (2013 - \$nil). The Company recorded a realized loss on sale of \$64,613 (2013 - \$nil).

At May 31, 2014, the Company held 587,000 (2013 - nil) common shares, of which 87,000 shares were valued at \$23,925 (2013 - \$nil) based on the trading price of the shares at year-end. The remaining 500,000 shares have been valued at \$104,500, being the fair value based on the trading price of the shares at year-end, discounted by the put option for the length of the escrow period.

The put options were calculated using the Black-Scholes option pricing model using the following assumptions:

	May 31, 2014	November 7, 2013
Escrow period (years)	0.27	0.83
Risk-free interest rate	1.05%	1.10%
Volatility	121%	121%
Dividend yield	N/A	N/A

The Company recorded a net unrealized loss of \$27,245 (2013 - \$nil) in accumulated other comprehensive loss.

### 8. RECLAMATION DEPOSIT

At May 31, 2014, the Company held a guaranteed investment certificate ("GIC") with an interest rate of 0.20% per annum and a fair value of \$3,500 (2013 - \$3,500). The GIC was held as a resource reclamation deposit and was restricted from other uses.

### 10. EXPLORATION AND EVALUATION ASSETS

#### a) Zacatecas North Property (Symphony)

By an asset purchase agreement dated April 30, 2008 and amended May 30, 2008 between Symphony and the property's vendor, Symphony purchased an undivided 100% interest in 18 mineral claims located adjacent to the Silver Queen mine property in central British Columbia, Canada, referred to as the Zacatecas North Property. In consideration for the claims, Symphony paid \$10,000 in cash and issued 500,000 of its common shares valued at \$0.125 per share based on the market value of the shares on share issue date.

On May 26, 2009, through the completion of the share exchange transaction, the Company acquired all of the issued and outstanding shares in the capital of Symphony from the Symphony shareholders in exchange for the issuance, by the Company, of 10,000,000 common shares to the Symphony shareholders and an additional 850,000 common shares for finders' fees, all of which were capitalized as exploration and evaluation assets. The shares issued had a fair value of \$0.46 per share resulting in \$4,991,000 being capitalized as exploration and evaluation assets.

During the year ended May 31, 2010, the Company reduced the mineral claims to 6 claims.

During the year ended May 31, 2013, the Company decided not to pursue this property and has written off the capitalized costs of \$5,782,342.

During the year ended May 31, 2014, the Company decided to write off the remaining cost of \$1.

### 10. EXPLORATION AND EVALUATION ASSETS (Continued)

#### b) Eastern Extension Properties/Urban Barry

##### (i) Urban Barry (Windfall Lake)

During the year ended May 31, 2010, the Company acquired a 100% interest in 95 claim blocks in Quebec near Windfall Lake at a cost of \$20,000 (paid), the issuance of 1,000,000 common shares to the vendors and 108,800 common shares to a finder (issued) and incurring \$140,000 of exploration expenditures (incurred). The shares were valued at \$155,232 based on the market value of the shares on share issue date. The property is subject to a 2% net smelter returns royalty of which 0.5% can be purchased by the Company for \$1,000,000.

In addition the Company purchased a 100% interest in 27 mineral claims located in the James Bay area in Quebec. The aggregate consideration is \$3,900 (paid) and 2,000,000 common shares (issued). The fair value of the shares was \$360,000 based on the market value of the shares on the share issue date.

During the year ended May 31, 2013, the Company reduced the mineral claims located to 95 as the claims in the James Bay area were not renewed.

##### (ii) Eastern Extension

The Company entered into an option agreement on September 15, 2010, as amended on February 8, 2011 and March 19, 2012 to acquire 100% interest in 23 additional mineral claims adjacent to the Urban Barry claims in Quebec for aggregate consideration of \$10,000 cash (paid), 1,750,000 common shares (issued) and \$750,000 in exploration expenditures (incurred). The company has completed the acquisition and owns 100% subject to the NSR below.

The agreement is subject to a 2% NSR of which 1% can be purchased for \$500,000. A finder's fee of 56,890 shares was paid in connection with this acquisition.

On November 7, 2013 the Company sold an additional 1% NSR to GRO in exchange for 1,000,000 common shares of GRO, valued at \$325,000 (note 7).

##### (iii) Lavoie Property acquisition (adjacent to Eastern Extension)

On December 30, 2010, the Company closed and received approval from the TSX Venture Exchange for a property purchase agreement entered into on December 10, 2010 to acquire 100% interest in 57 mineral claims east of the Urban-Barry Township in Quebec. Consideration paid was 2,000,000 common shares valued at \$860,000 based on the market price of the shares on the share issue date, and cash payments of \$35,000. The agreement is subject to a 2% NSR of which 1% may be purchased for \$1,000,000.

### 11. OTHER LIABILITIES

Other liabilities consist of the liability portion of the flow-through shares issued. The following is a continuity schedule of the liability portion of the flow-through share issuances.

	Issued During the Year Ended May 31, 2014	Issued During the Year Ended May 31, 2013	Total
Balance, May 31, 2012	\$ -	\$ -	\$ -
Liability incurred on flow-through shares issued September 2012	-	138,875	138,875
Liability incurred on flow-through shares issued February 2013	-	44,625	44,625
Settlement of flow-through share liability on incurring expenditures	-	(88,809)	(88,809)
Balance, May 31, 2013	-	94,691	94,691
Liability incurred on flow-through shares issued June 2013	-	-	-
Settlement of flow-through share liability on incurring expenditures	-	(5,355)	(5,355)
Balance, May 31, 2014	\$ -	\$ 89,336	\$ 89,336

#### During the year-end May 31, 2014

In June 2013, the Company issued 4,000,000 flow-through units at a price of \$0.05 per unit. The Company renounced the flow-through tax deductions to subscribers on December 31, 2013 ("2013 flow-through share financing"). There was no premium paid by investors and nothing was recorded as other liabilities.

At May 31, 2014, the Company still had remaining flow-through share commitments from its 2012 renunciations of \$314,062. Accordingly, the Company will be required to pay Part XII.6 tax and penalties on the unspent commitment. Included in accounts payable and accrued liabilities is \$39,577 related to Part XII.6 tax and penalties.

At May 31, 2014, the Company had a remaining commitment to incur exploration expenditures in relation to its 2013 and 2012 flow-through share financing of \$510,062.

#### During the year-end May 31, 2013

In September 2012, the Company issued 5,555,000 flow-through units at a price of \$0.11 per flow-through unit. The Company renounced the flow-through tax deductions to subscribers on December 31, 2012. The premium paid by investors was calculated as \$0.03 per unit. Accordingly, \$138,875 was recorded as other liabilities.

In February 2013, the Company issued 1,487,500 flow-through units at a price of \$0.08 per unit. All proceeds were received by December 31, 2012 giving flow-through tax deductions to subscribers for 2012 ("2012 flow-through share financing"). The premium paid by investors was calculated as \$0.03 per unit. Accordingly, \$44,625 was recorded as other liabilities.

As at May 31, 2013, the Company had a remaining commitment to incur exploration expenditures in relation to flow-through share financing totaling \$337,603.

### 12. RELATED PARTY TRANSACTIONS

These amounts of key management compensation are included in the amounts shown on the consolidated statements of comprehensive loss:

	<b>2014</b>	<b>2013</b>
Short-term compensation	\$ 159,000	\$ 361,735
Share-based payments	\$ -	\$ -

During the year ended May 31, 2014, short-term compensation to related parties consisted of \$120,000 in management fees (2013 - \$165,750), \$39,000 in professional fees (2013 - \$87,500) and \$nil (2013 - \$108,485) in deferred exploration costs.

During the year ended May 31, 2014, the Company received \$11,970 (2013 - \$44,250) for the recovery of rent expense from a company related by a common director.

As at May 31, 2014, the Company had outstanding amounts payable to an officer and a director of the Company of \$37,450 (2013 - \$38,200) and to companies related by common directors of \$72,663 (2013 - \$82,342) for outstanding fees and expenses. The amounts payable are non-interest-bearing, uncollateralized and are repayable on demand.

### 13. SHARE CAPITAL

a) Authorized

Unlimited number of common voting shares without par value

b) Issued and outstanding

**During the year ended May 31, 2014**

On June 25, 2013, the Company completed a non-brokered private placement for gross proceeds of \$250,000. The Company issued 4,000,000 flow-through units and 1,000,000 non-flow-through units at a price of \$0.05 per unit. Each flow-through unit consisted of one flow-through common share of the Company and half of one share purchase warrant. Each non-flow-through unit consisted of one non-flow-through common share of the Company and half of one share purchase warrant. Each whole warrant entitles the holder to acquire one non-flow-through common share of the Company at an exercise price of \$0.10 per share on or before June 25, 2014. The Company paid commissions and other costs in relation to the private placement of \$45,215 and issued 200,000 agent's warrants with a value of \$1,863 (note 13(c)). Each agent's warrant entitles the holder to acquire one common share of the Company at an exercise price of \$0.10 per share on or before June 25, 2014.

**During the year ended May 31, 2013**

On February 4, 2013 the Company completed a non-brokered private placement for gross proceeds of \$240,000. The Company issued 1,487,500 flow-through units at a price of \$0.80 per unit and 2,420,000 non-flow-through units at a price of \$0.05 per unit. Each flow-through-unit consisted of one flow-through common share of the Company and one share purchase warrant that entitles the holder to acquire one non-flow-through common share of the Company at an exercise price of \$0.12 per share on or before February 4, 2015. Each non-flow-through unit consisted of one non-flow-through common share of the Company and one share purchase warrant that entitles the holder to acquire one non-flow-through common share of the Company at an exercise price of \$0.10 per share on or before February 4, 2015. The Company paid commissions and other costs in relation to the private placement of \$19,609.

### 13. SHARE CAPITAL (Continued)

#### b) Issued and outstanding (continued)

On September 21, 2012, the Company completed a brokered private placement for gross proceeds of \$696,050. The Company issued 5,555,000 flow-through units at a price of \$0.11 per unit and 1,000,000 non-flow-through units at a price of \$0.085 per unit. Each flow-through unit consists of one flow-through common share of the Company and half of one common share purchase warrant that entitles the holder to acquire one non-flow-through common share of the Company at an exercise price of \$0.15 per share on or before March 21, 2014. Each non-flow-through unit consists of one non-flow-through common share of the Company and one common share purchase warrant that entitles the holder to acquire one non-flow-through common share of the Company at an exercise price of \$0.12 per share on or before March 21, 2014. The Company paid commissions and other costs in relation to the private placement of \$93,533 and issued 524,400 agent's warrants with a value of \$29,673 (note 13(c)). Each agent's warrant entitles the holder to acquire one common share of the Company at an exercise price of \$0.085 per share on or before March 21, 2014.

#### c) Warrants

Warrant transactions and the number of warrants outstanding are summarized as follows:

	2014		2013	
	Number of Warrants	Weighted Average Exercise Price	Number of Warrants	Weighted Average Exercise Price
Outstanding, beginning of year	21,487,167	\$ 0.21	26,109,433	\$ 0.32
Issued	2,700,000	0.10	8,209,400	0.12
Expired	(17,579,667)	0.24	(12,831,666)	0.37
Outstanding, end of year	6,607,500	\$ 0.10	21,487,167	\$ 0.21

The following warrants were outstanding and exercisable:

Expiry Date	Weighted Average Remaining Contractual Life in Years	Exercise Price	2014
June 25, 2014**	0.07	\$ 0.10	2,700,000
February 4, 2015	0.68	\$ 0.10	2,420,000
February 4, 2015	0.68	\$ 0.12	1,487,500
	0.43		6,607,500

\*\* Expired unexercised subsequent to year-end

For the Years Ended May 31, 2014 and 2013

(Expressed in Canadian Dollars)

### 13. SHARE CAPITAL (Continued)

#### c) Warrants (continued)

The Company applies the fair value method using the Black-Scholes option pricing model in accounting for its agent's warrants granted. The fair value of each agent's warrant grant was calculated using the following weighted average assumptions:

	2014	2013
Expected life (years)	1.00	1.50
Risk-free interest rate	1.27%	1.25%
Volatility	157%	116%
Dividend yield	N/A	N/A
Stock price at grant date	\$0.03	\$0.10
Exercise price	\$0.10	\$0.085
Weighted average grant date fair value	\$0.01	\$0.06

Option pricing models require the input of highly subjective assumptions regarding volatility. The Company has used historical volatility to estimate the volatility of the share price.

#### d) Stock options

The Company has a stock option plan to grant incentive stock options to directors, officers, employees and consultants. Under the plan, the aggregate number of common shares which may be subject to option at any one time may not exceed 10% of the issued common shares of the Company as of that date, including options granted prior to the adoption of the plan. Options granted may not exceed a term of 10 years, and the term will be reduced to one year following the date of death of the optionee. All options vest when granted unless they are otherwise specified by the Board of Directors or if they are granted for investor relations activities. Options granted for investor relations activities vest over a 12 month period with no more than 25% of the options vesting in any three month period.

The following is a summary of option transactions under the Company's stock option plan for the years ended May 31, 2014 and 2013:

	2014		2013	
	Number of Options	Weighted Average Exercise Price	Number of Options	Weighted Average Exercise Price
Outstanding, beginning of year	2,434,783	\$ 0.18	4,389,783	\$ 0.21
Expired	(2,434,783)	0.18	(1,200,000)	0.24
Cancelled	-	-	(755,000)	0.33
Outstanding, end of year	-	\$ -	2,434,783	\$ 0.18

The Company applies the fair value method using the Black-Scholes option pricing model in accounting for its stock options granted. No stock options were granted during the years ended May 31, 2014 and 2013 and no share-based compensation expense was recorded.
